

INDOOR FIREPLACES

FIRE BY **escea.**

Before social media, there was just social.

People are naturally drawn to flames and an Escea fireplace quickly becomes a home's social hub, encouraging face-to-face interaction and discussion deep into the night.

With the perfect balance of form and function, Escea gas fireplaces are made for modern homes and busy lives. Using the latest in gas fireplace technology, an Escea delivers heat that's both powerful and efficient.

"We take great pride at being made in New Zealand and tapping into the incredible pool of local technology and design talent. I marvel at what our team of designers and engineers can achieve and love seeing people interact in front of our fireplaces. I guess there are some things you just can't do on Facebook"

ALEX HODGE
Lead Designer

Fireplace, anyplace

Escea's flexible flues run up, down or even sideways, for complete design freedom.

Born in New Zealand

Designed and made in the deep south of New Zealand, the best place to test the limits of heat and efficiency.

Crafted with care

From concept to completion, our people take pride in every fireplace they have a hand in making.

Indoor Fireplace Range

Get to know Escea's range of indoor fireplaces.
There's (at least) one for every home and every lifestyle.

DS Series DS1150, DS1400, DS1650, DS1900

Truly frameless and ultra-wide gas fireplaces for a minimalist look that focuses on the flame.

Pg 4

DX Series DX1000, DX1500

Linear high heat output gas fireplaces to effortlessly heat one, two or multiple rooms.

Pg 8

DL Series DL850, DL1100

High heat output combines with high efficiency to deliver a powerful range of fireplaces.

Pg 12

DF Series DF700, DF960

Smaller dimensions and flexible installation make this series ideal for renovations and new builds.

Pg 16

DFS730 Freestanding

Designed for homes with minimal wall space, or to replace an existing freestanding woodburner.

Pg 20

DS Series

SINGLE OR DOUBLE SIDED

[Click for more](#)

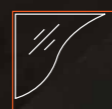

The DS Series has a small footprint and a big impact. These fireplaces are truly frameless drawing your eye straight to the flames – where the wall ends the glass begins. Available from 1.15m wide all the way up to an impressive 1.9m wide, the DS Series of ultra-wide fireplaces command attention.

The large window gives a clear view of the generous fuelbed, large flames and when double sided you can also see the room next door. And being able to flue the fireplace through the ceiling, the floor or the wall – the only limitation is your imagination.

SMART HEAT™

Control the temperature of your home with your smart phone.

TRULY FRAMELESS

Where the wall ends, the glass begins.

DS Series Models

DX Series

MULTIROOM | SINGLE OR DOUBLE SIDED

[Click for more](#)

The DX Series combines dramatic flame action with Escea's Heat Ducting Technology, which provides heat into several rooms and evenly distributes within the same room. With its minimalist aesthetic, the DX Series works with any interior style and their effect grows exponentially when they're double sided.

Reflective side panels give the appearance of an even wider fireplace and add to the infinite flame effect. Customise the look of your fireplace by choosing between a variety of different fuelbeds and frames.

SMART HEAT™

Control the temperature of your home with your smart phone.

MULTIROOM

Duct heat from the fireplace to multiple vents throughout your home.

DL Series

STATEMENT FRAME | SINGLE SIDED

[Click for more](#)

High heat output combined with high efficiency is what distinguishes the DL Series from the rest.

These fireplaces work with both modern and traditional decor - the frame within a frame providing a statement detail. Both the DL850 and the DL1100 feature smartphone control and the Powered Direct Vent flue system gives you the flexibility to install the fireplace wherever you want.

SMART HEAT™

Control the temperature of your home with your smart phone.

HIGH HEAT OUTPUT

Powerful heat output for large open-plan living spaces.

DF Series

RETROFIT OPTION | SINGLE SIDED

[Click for more](#)

With its compact size and flexible installation, the DF Series is Escea's most versatile range of gas fireplaces. The DF700, with its smaller dimensions, is perfect for retrofitting into existing cavities. Both the DF700 and DF960 also work well in new builds, thanks to their contemporary style and Powered Direct Vent flue technology, which allows you to put the fireplace anywhere.

A design feature of the DF Series is the raised fuelbed which accentuates the flame pattern. The minimalist frame highlights the big flames even further.

SMART HEAT™

Control the temperature of your home with your smart phone.

POWERED DIRECT VENT

Fan-forced airflow for ease of install and design freedom.

DFS730

FREESTANDING

[Click for more](#)

The freestanding DFS730 is designed as a modern gas fireplace replacement for an existing freestanding woodburner, or for installing into a room where you do not have enough wall space for an inbuilt fireplace.

This sleek black fireplace fits into tight spaces, and it has a large glass window for maximum flame viewing. The beauty of gas is that you get the same flame and same heat as your old woodburner, without the mess or fuss. The Powered Direct Vent flue system draws air from outside the home into a sealed unit, keeping your home free of moisture and fumes.

SMART HEAT™

Control the temperature of your home with your smart phone.

POWERED DIRECT VENT

Fan-forced airflow for ease of install and design freedom.

Features

Powered Direct Vent

Our Powered Direct Vent flue technology achieves greater efficiencies and allows flues up to 12m in length which can be run horizontally or vertically. Flues can finish either on a roof or outside wall and can even be run under a floor. It uses outside air for combustion rather than room air and is a completely sealed system unaffected by other appliances such as extractor fans. With no fumes coming in and no hot room air going out, you can keep warmer and healthier.

This innovation also gives you the flexibility to put the fireplaces wherever you like, without the need for cavities or even walls to install. Another benefit of Power Flue is joinery-friendly Zero Clearance installation. The key is the fan-forced airflow, which allows you to install the flues in any direction, making even the most complex flue run possible.

Available on all indoor fireplaces.

Multiroom Heat Ducting

Multiroom, Escea's Heat Ducting Technology, captures up to 90% of the available heat and carries it throughout the house via ceiling and floor vents. The ducting technology allows you to provide heat to more than one room in your home.

Available on:
DX1500, DX1000

Smart Heat

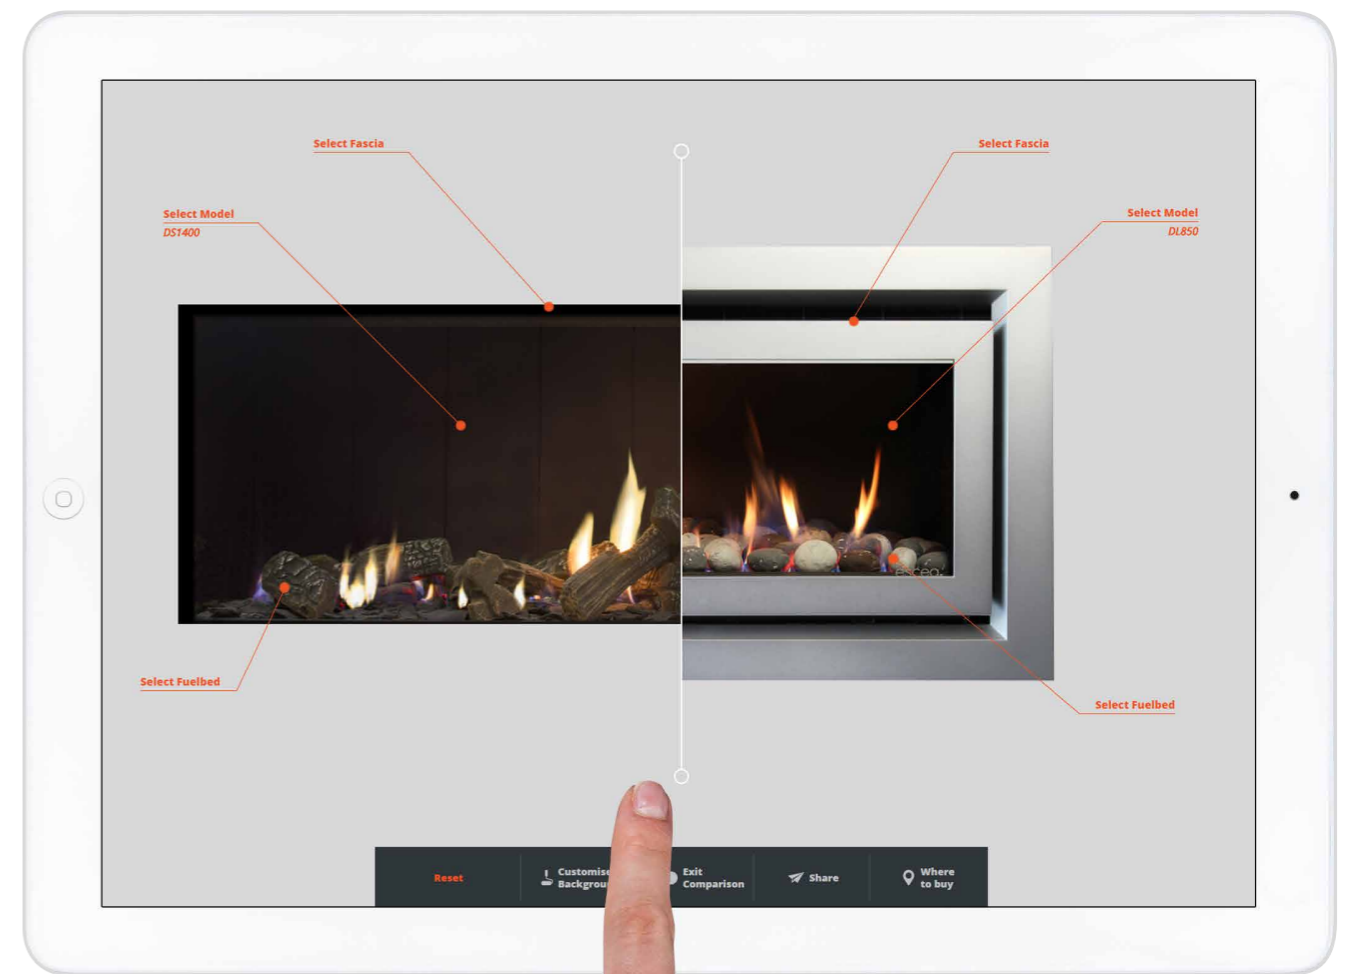

When connected to your home network our Smart Heat system lets you turn on your fire through your Smart Phone or any secure internet connection and integrates with most Home Automation systems. It keeps the room at the temperature you select and continuously adjusts to ensure the most efficient burn – which is what we mean by Smart Heat.

Available on all indoor fireplaces.

Design your fireplace

Undecided on which fascia or fuel bed suits your home?
Escea's Design Your Fire online tool lets you try on and compare the different fireplace, fascia, fuel bed and wall combinations.

All Escea indoor gas fireplaces come with a wireless remote (thermostat and timer integrated), and are equipped with Escea's mobile Smart Heat capability. Note, indoor fireplaces require a wired connection to your internet router for Smart Heat to function. This cable is included only on DX and DS Series fireplaces, but is an optional extra across the full indoor range.

*Cavity size may vary depending on installation requirements or fascia type. See installation manual for more information.

**May vary depending on flue or gas type.
