

Pure filtered water,
direct from your tap

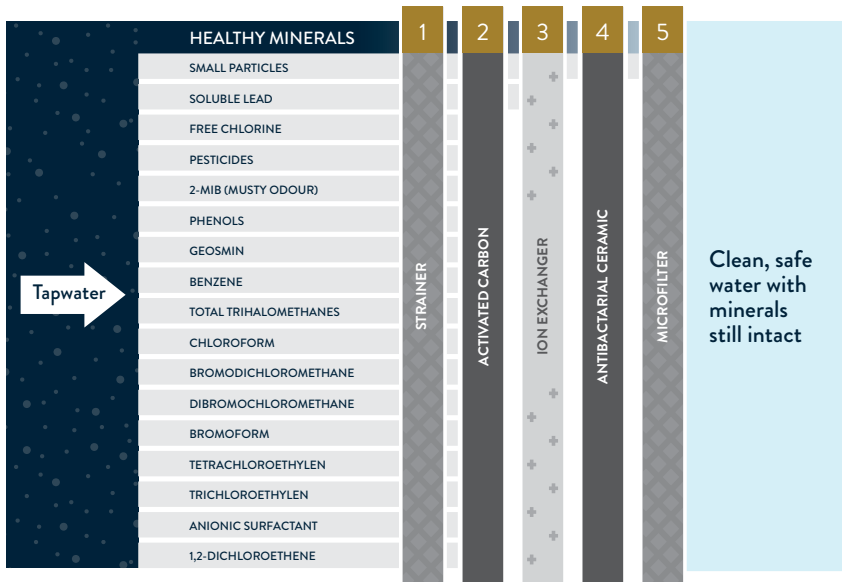

Tap into the future today

Taqua's built-in filtration sink mixer provides safe, clean and delicious filtered water directly from the tap. With just one touch, you can choose between filtered water to drink or wash fruit and vegetables, then switch back for regular tap water to wash up. It's Japan's #1 water filter and is precision-made in Japan to the highest standards. Now in Australia, Taqua is being increasingly chosen for its great tasting water and its convenience too.

HOW TAQUA WORKS

Note: Premium cartridge filtering shown. Different substances are filtered depending on the cartridge type used. Based on Japanese Industrial Standard JIS S 3201.

Our in-tap filter provides you with safe, clean water

Just turn the knob for filtered water and turn back for regular tap water.

Micro-filter and in-built strainer significantly reduce small particles.

Anti-bacterial ceramic construction inhibits growth inside the cartridge.

Activated carbon-ion exchanger for soluble lead, chlorine and more.

TAQUA IS MAKING A DIFFERENCE IN THE HOME

“When you’ve got young kids, you want to give them the cleanest water possible. The built-in water filter tap doesn’t take up any extra space in the kitchen, and replacing the cartridge is so easy.”
- Melinda (39)

“Everyone knows filtered water tastes better than normal tap water, but you can actually taste the difference in cooking as well. I also love that we could take it with us and keep using it after we moved to a new house.”
- Tim (46)

NICHOLAS GURNEY INTERIOR DESIGNER / ARCHITECT

“I enjoy the Japanese precision evident in Taqua products. A client’s decision is not based on material finish or styling, it’s function-driven and clients are pleased to know they have installed a Japanese best-seller in their home. The outstanding piece of ingenuity has been combining tap and filtration in a single unit, and importantly, doing so in a manner that is neatly concealed.”

The multi award-winning T-5 is the pinnacle of technology

Not only is it easy to use, Taqua's T-5 looks terrific too in either chrome or matte black, and will fit right into any home, office, or hospitality environment.

Aside from the convenience of an on-tap knob for effortless shifting between filtered water and regular tap water, the T-5's newly

designed shower function is highly accurate and very efficient, with the result being that there's almost no unwanted splashing at all.

For delicious filtered water with free space under your sink, you simply can't go past the T-5 for ease of use, performance and quality.

Why you'll love having a Taqua at your place

Switch from filtered water to tap water by just turning the knob.

Filter provides the healthiest water for children's developing immune systems.

Easy food-prep and cleaning with the handy spray nozzle and extendable hose.

Sophisticated, minimalist design fits seamlessly into any modern kitchen.

Save space in the kitchen – no need for bulky tanks or underneath sink filters.

FREE

UPGRADE TO A 5-YEAR EXTENDED WARRANTY

Once you have purchased, you can extend Taqua's standard two year warranty to five years at no cost, by simply registering your details on the Taqua website: www.taqua.com.au

Choose the filter cartridge you want

Taqua's filter cartridges are precision-made in Japan. They're designed to significantly reduce the level of toxic compounds, carbon taint and nasty odours from the water you enjoy at home – direct from your tap.

Filter type	Substances filtered	Flow rate	Capacity	Cost per cartridge
Standard	7 (chlorine, pesticides, lead, musty odours, phenols, geosmin, and benzene)	4 Ltr / min	1,200 Ltr	\$40 + GST (postage incl)
Premium	16 (as above plus a range of industrial solvents and organic compounds)	3 Ltr / min	1,200 Ltr	\$45 + GST (postage incl)

Fit a cartridge yourself in under 10 seconds

ENJOY FILTERED WATER ALL THE TIME

We recommend replacing Taqua water filter cartridges every 3-4 months for optimal effectiveness.

Register online for automated delivery of replacement cartridges to your place, so you don't have to try and remember when the next one is due.
