

The Ultimate Solar Protection

15 Year Weather Endurance Test

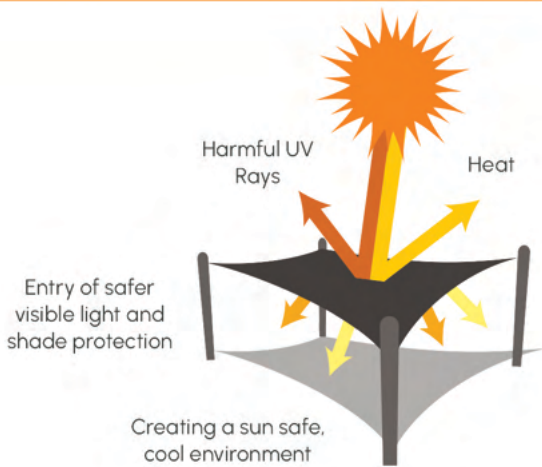

Z16 digital scan of fabric test sample

A 15 year endurance weather test conducted by Rainbow Shade confirms the outstanding durability, UV protection, lasting strength and colourfast characteristics of Z16 shade fabric.

Rainbow Shade submitted fabric samples to two independent accredited testing agencies. Breaking force, tear resistance and UV protection tests were conducted. The results which came back from the 15 year old fabric testing are remarkable.

"15 Year old Z16 fabric conquers the harsh Queensland climate, installed in the Brisbane suburb of Capalaba".

15 Year Weather Endurance Test Results:

- The tests revealed the fabric was extremely strong, still having slightly less than 80% of its original strength in the warp.
- The tests revealed the fabric was still providing very high protection at 95.1% UVR Block.

(Tested to Australian Standard 2001.1.3.1-2001 and 4174-1994)

High UV-R Protection (Up to 99%)

Easy Care & Maintenance

Great Heat & Glare Reduction

Fire Rated Fabric

Hail Resistance

Proven Durability & Longevity

Safe Filtered Light Transmission

High Tensile Strength

100% Recyclable
