SOUNDLINATM
Perforated architectural wallpaper
for acoustic comfort. (PAT. PENDING)

SOUNDLINA™ by Screenwood (PAT. PENDING) is the world's first perforated architectural wallpaper with high acoustic performance for noise reduction and reverberation control.

SOUNDLINA™ is meticulously designed and crafted to enhance a space's beauty, comfort, and wellbeing.

How SOUNDLINA™ works:

SOUNDLINA™ perforated wallpaper reduces echo by allowing sound to travel through its subtle perforations to the perforated plasterboard, where the acoustic insulation absorbs it. Tested to achieve 0.85 NRC when installed as recommended.

1. SOUNDLINA™ perforated wallpaper
2. Perforated plasterboard (painted black for aesthetics)
3. Acoustic insulation 14kg/m³
4. Stud wall
5. Suspended ceiling system
