

# TAP INTO THE FUTURE

Japan's best selling  
built-in filtration sink mixer,  
now available in Australia.

Taqua

# 5 LAYER FILTER REMOVES MULTIPLE SUBSTANCES

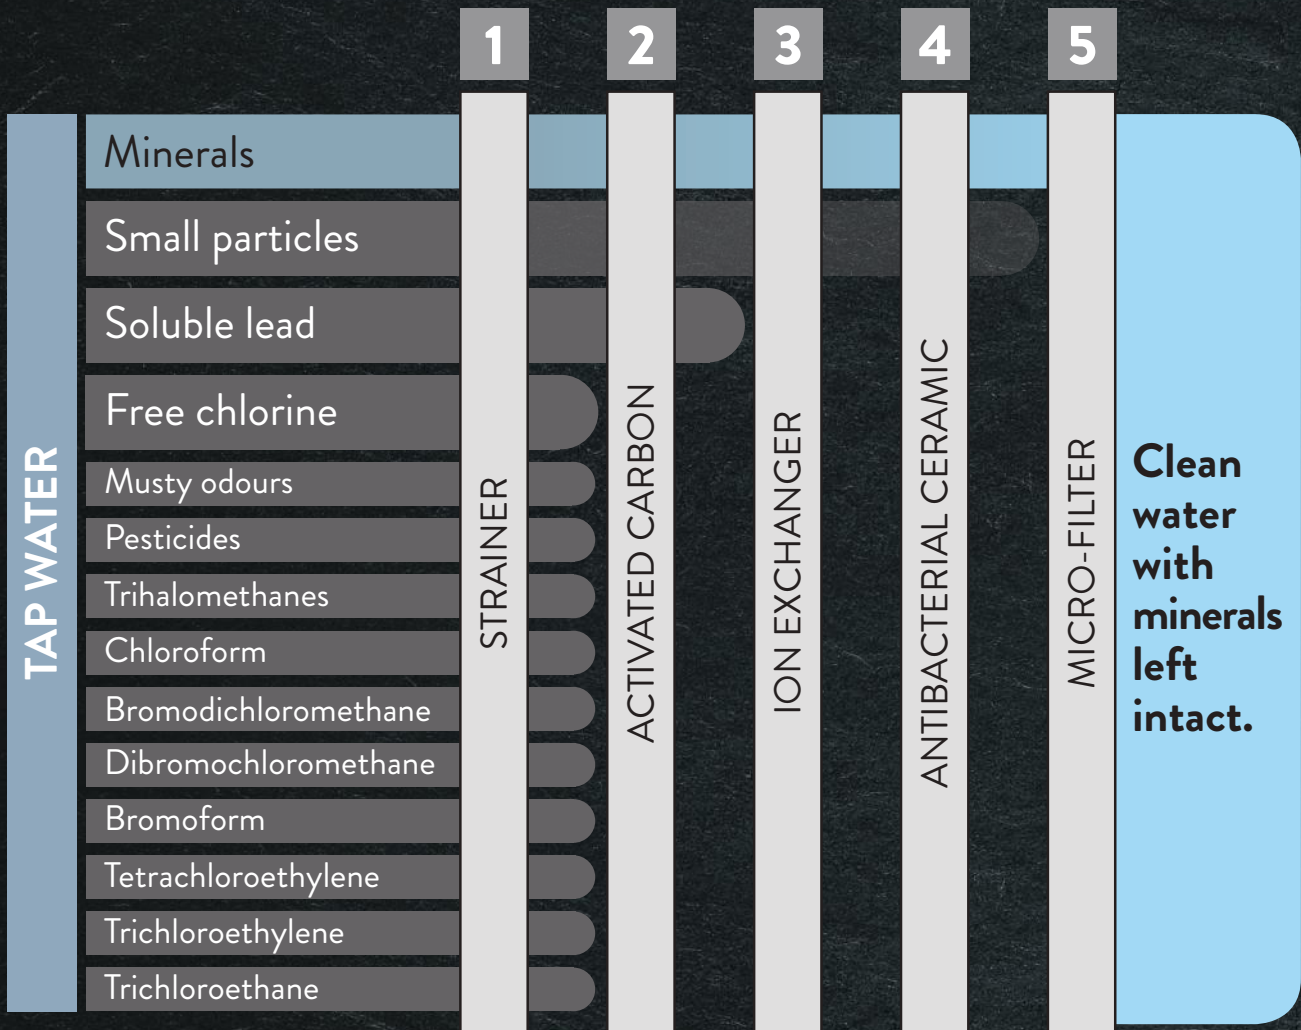

ON ↔ OFF

With just one touch, choose between tap water or filtered water.

## HOW IT WORKS

Different substances are filtered depending on the cartridge type used.

5

**MICRO FILTER**

Removes small particles.

4

**ANTIBACTERIAL CERAMIC**

Inhibits bacterial growth inside the cartridge. If used daily, there is no need to run the tap before using it as drinking water.

\* If left unused for two or more days, filtered water should be run through the tap for at least 20 seconds before using it as drinking water.

1

**STRAINER**

Removes small particles.

**FILTER CARTRIDGE**

2

3

**ACTIVATED CARBON-ION EXCHANGER**

Removes chlorine, soluble lead etc.

# SMART

- Australia's 1st filtration system that sits inside the tap. No tanks, water bottles or other bulky equipment, so you can save space in the kitchen.
- The system filters 4 litres of water every minute so you don't have to wait long.

# SIMPLE

- Subscribe online to automate delivery for replacement cartridges. We recommend replacing cartridges every 3-4 months in order to maintain the effects of the Taqua filtration system.

- It only takes 10 seconds to change the cartridge with 3 easy steps. No need to hire or play the plumber.
- Only 1 push of the button to change tap water into filtered water.

# SAVE

- Promotes eco-friendly drinking habits.
- Helps you save money by not having to purchase bottled water.

# T-3

A built-in filtration sink mixer featuring a simple and stylish design.

## Filtered water available with the push of a button
