COLOUR CHART

vitracore G2®

ENGINEERED ALUMINIUM PANEL / MANUFACTURED BY FAIRVIEW

LIGHT WEIGHT, NON-COMBUSTIBLE, CUSTOMISABLE, HIGH PERFORMING ENGINEERED ALUMINIUM CLADDING SYSTEM

PVDF & FEVE COATINGS

Vitracore G2 uses only the highly recognised PVDF or FEVE paints known for their excellent durability.

PVDF (Polyvinylidene Fluoride) is a fluoropolymer-based resin used for coating in many industries and applications for their brilliant weather and UV resistance and unique flexibility.

FEVE (Fluoroethylene Vinyl Ether) is used in many architectural settings due to its resistance to weathering and UV. FEVE coatings have a higher gloss and colour range. The higher gloss range allows FEVE coatings to produce a brighter colour palette and sees it commonly used to produce colours such as yellow, red and green.

PVDF and FEVE's main benefits are around their extreme resistance to UV, temperature cycling, salt spray and atmospheric fallout.

Vitracore G2 panels come in a range of anodised finishes, offering both standard and customised colours and textures, including solid colours, metallic, woodcreate, naturaline, stone effect, sparkling and chromatic.

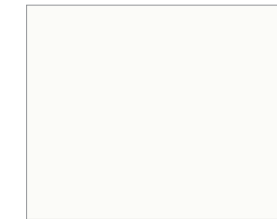

COLOUR MATCHING & CREATION

Vitracore G2 has an unlimited colour range, as we can create almost any finish or colour to bring your architectural design to life.

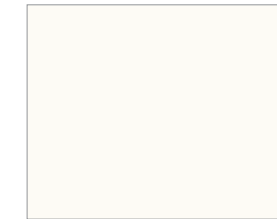

Vitracore G2 panels can also be colour matched to blend seamlessly with existing façades and buildings.

Contact the Fairview team today to discuss your project requirements and vision.

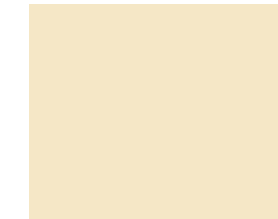

SOLID COLOURS: WHITE INSPIRED BY PURITY
