ROLL-FORMED STEEL CLADDING / BY FAIRVIEW

ROLL-FORMED STEEL CLADDING / BY FAIRVIEW

## **ABOUT VITRALOC**

Vitraloc architectural steel cladding makes a visually striking and sophisticated design statement with its distinctive tall sharp ribs and flat smooth pan profiles for that bold and modern architectural look.

Made from non-combustible roll-formed steel, Vitraloc provides peace of mind and freedom of expression with an extensive pallet of colour and textures.

Vitraloc is part of Fairview's extensive architectural product range and shares a unique DNA with the distinctive Stryüm aluminium linear wall cladding system.

Vitraloc is suitable for both vertical and horizontal applications and is available in two modern profiles – 38mm Seam direct-fix and 25mm Shadow interlocking panels.

Fairview has made product selection simple by offering an extensive range of standardised flashings and two profiles options in the 38mm Seam panel with a 265mm cover and 25mm Shadow interlocking panels with a 285mm (plus 15mm express joint) cover. The pan width of the two profiles reflects optimum performance and aesthetic proportions. Custom widths are also available on request.

Leaving little to chance, Vitraloc cladding with its accompanying flashings and accessories forms part of an engineered and tested system.

## **DOCUMENT TRACKING**

VERSION#	DATE	CHANGES
1.0	May 21st 2021	Initial issue

ROLL-FORMED STEEL CLADDING / BY FAIRVIEW

## 2.2 KEY FEATURES

PRODUCT	VITRALOC
Product DNA	Roll-formed Steel.
Finish	Continuous Coil Coated.
Fixing system	Roll-formed interlocking panels taking advantage of a fully detailed system and thermally managed substructure.
Application	Type A, B and C construction where non-combustible materials are required such as mixed use developments, residential construction and large-scale government infrastructure projects.
Warranty	15 year standard warranty, subject to terms and conditions.

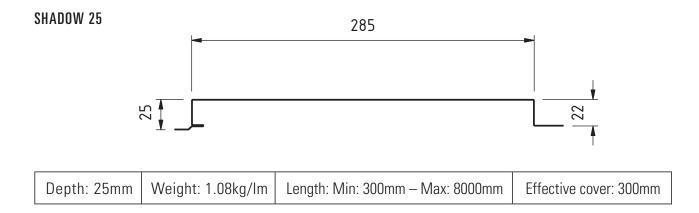

## PANEL INFORMATION

Vitraloc cladding is manufactured from G300 colour coated steel, aluminium/zinc/magnesium or zinc-aluminium alloy coated steel. Products conform to the following Australian standards that are called up in the National Construction Code (NCC).

- Steel material
- All metallic coated steel complies with AS 1397
- Painted steel product conforms with AS 2728

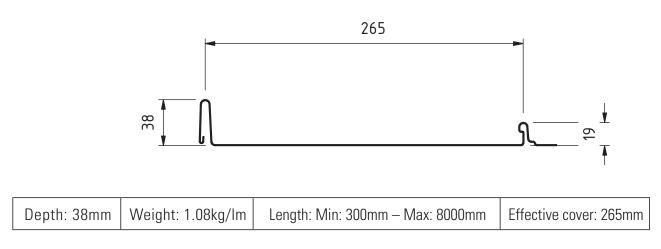

## PROFILES

# FINISHES

The Vitraloc architectural range of steel cladding profiles are available in an extensive range of classic and contemporary colours, textures, and finishes.

# C-MAX<sup>TM</sup> - COLOUR COATED STEEL AND METALLIC COATED STEEL COIL - SADP/PVDF/FEA

#### SUBSTRATE

- Hot-dipped Aluminium/Zinc alloy coated steel coil
- Alloy coating weight 150gms/m2
- Manufactured to AS 1397:2021

#### SURFACE COATINGS

#### SADP - SUPER ADVANCED DURABLE POLYESTER COATING SYSTEM

- Nominal film Thickness 18µm ± 2µm. 25% Gloss
- Independently laboratory tested to the requirements of AS/NZS 2728:2013
- Suitable for ISO 9223:2012 and Atmospheric Classifications C1-C3

#### PVDF - CHEMICALLY RESISTANT 70% POLYVINYLIDENE FLUORIDE COATING

- Nominal film Thickness 20µm ± 2µm.
- Independently laboratory tested to the requirements of AS/NZS 2728:2013
- Suitable for ISO 9223:2012 and Atmospheric Classifications C1-C3

#### FEA - FLEXIBLE EXTERIOR ACRYLIC

- Nominal film Thickness 18µm ± 2µm. 25% Gloss
- Independently laboratory tested to the requirements of AS/NZS 2728:2013
- Suitable for ISO 9223:2012 and Atmospheric Classifications C1-C3

## $C-TEX^{TM} - PREMIUM PATTERNED STEEL$

#### PATTERNED PREMIUM METALLICS AND WOODGRAINS

## SUBSTRATE

- Hot-dipped Aluminium/Zinc/Magnesium alloy coated steel coil
- Manufactured to AS 1397:2021

#### SURFACE COATING

- Advanced organic UV durable Polyvinylidene Fluoride (PVDF).
- Nominal film thickness coating system 35 $\mu$ m ± 8 $\mu$ m.
- Independently laboratory tested to the requirements of AS/NZS 2728:2021
- Suitable for ISO 9223:2012 and Atmospheric Classifications C1-C3

## **INSTALLATION OVERVIEW**

Vitraloc wall cladding forms part of an engineered and tested assembly tested to AS/NZS 4284: Testing of Building Facades and includes proprietary components specifically developed to improve performance and enhance appearance through:

- Moisture management
- Thermal/Heat management
- Movement management

## WARRANTY

Vitraloc is an incredibly durable material when used in the right application. Please contact your Fairview representative for full terms and conditions.

#### IMPORTANT WARRANTY INFORMATION

Maintaining your Vitraloc finish is an important component to upholding your warranty. Cleaning frequencies are based on your project location and provided in the warranty. Therefore you should document each time your Vitraloc panels are cleaned.

Recommended cleaning agents:

- Mineral spirits
- Organic cleaners
- PH-Neutral Solvents
