## ABOUT

We stand at the intersection of landscape and architecture, our work is founded in balance — between people and place — enhancing the Australian built environment through quality, design detail and durability that surpasses time and trends.

## AUSTRALIAN MANUFACTURING

Quatro Design is synonymous with quality. To achieve consistent high quality and durability, our products are manufactured using modern and specialized GRC equipment.

The manufacture of GRC production requires a high degree of hands-on specialized labour coupled with close attention to detail.

Many of our employees are long standing and valued members of our team who understand GRC production and what is required to deliver consistent quality. These highly valued personal skills coupled with modern specialised GRC equipment is an important part of our manufacturing philosophy.

Each piece is checked during the manufacturing process to ensure compliance with our strict standards and to ensure that our products deliver on customer expectations.

We believe in the value of hand finishing all our products, with attention to detail that has been acquired over years of manufacturing and in supporting the development of our team.

We're proud of the support that we are able to give our local community and the role that we continue to play in enhancing the Australian built environment.

## MATERIAL & STANDARD COLOURS

### GLASSFIBRE REINFORCED CONCRETE

Glassfibre Reinforced Concrete (GRC) has made a significant contribution to the technology and aesthetics of the Australian built environment due to its ability to be shaped and moulded into virtually any size or shape.

It is a mixture of cement, sand and other additives as well as alkali resistant glass fibres that are blended together during manufacturing to create strong yet lightweight products (compared to cast concrete).

Glass fibre strands are used to reinforce the concrete, which negates the need for steel reinforcing, and allows the thickness of the GRC to be reduced without compromising on strength

This also results in products with a lower environmental impact due to reduced cement usage and transport costs (approx 40% less).

### INTEGRAL CONCRETE COLOUR

During manufacturing the GRC mixture can be coloured by blending mineral oxide pigments with either grey or white cement. Our product collections are available in four standard colours: Charcoal, Concrete Grey, White and Kalgoorlie.

Left to right, Charcoal, Concrete Grey, White, and Kalgoorlie.

### NON - COMBUSTIBLE

All of Quatro Design's GRC products are certified non-combustible in accordance with CSIRO Combustibility Test AS 1530.1-1994.

# OPTIONS & ACCESSORIES

For detailed information on our Colours, Options & Accessories visit [quatrodesign.com.au](http://quatrodesign.com.au) or request a copy of our Options & Accessories Guide. Contact our sales team for pricing.

## INTEGRAL CONCRETE COLOUR

During manufacturing the GRC mixture can be coloured by blending mineral oxide pigments with either grey or white cement.

Our four standard colours are Charcoal, Concrete Grey, White and Kalgoorlie.

## MINERAL OXIDE COLOURS

Coloured mineral oxides can be added to the GRC mixture during production to colour the sand-cement mix. (Please refer to the full **CCS Pigment Colour Range**.)

## PAINTED COLOUR

Our products can be painted in virtually any colour, including special paint effects like rust, aged copper and bridge paint.

Please note that we do not recommend painting seating units without timber tops or the use of dark mineral oxides, like charcoal, for outdoor seating. Dark surfaces can reach very high temperatures when placed in full sun.

## SPECIALITY FINISHES & EFFECTS

We can achieve a range of special finishes and special effects on the exterior surface of our products. They include:

- Pitted Surface
- Designs and textures moulded onto the product surface.
- Anti-graffiti coating

## SKATE DETERRENTS

Stainless steel anti-skate studs can be installed to deter skateboarders from marking planters and street furniture products.

## DRAINAGE AIDS & WATERPROOFING

All planters have complimentary clear Acrylic-based internal waterproofing. DrainEZE drainage hole screens are fitted to all smaller pots, bowls and planter boxes and is included in the product price. Versiflex flexible drainage cells are fitted to all larger pots, bowls and planter boxes and is included in the product price.

- Bitumen-based Internal Waterproofing as per "waterproof column" in price list. (Non-toxic and fish-safe option also available).
- Drainage Regulator Riser used to raise the height of the drainage hole to minimise dripping, as per "add drainage riser" column in price list.

## TIMBER

Native Australian hardwood (Spotted Gum) is used on all seating units and can be substituted with a timber option of your choice. (Depending on suitability).

Photograph shows Tonka hardwood.

## UPHOLSTERY

Upholstered seating inserts can be added to selected seating ranges. We partner with Comax Australia, an industry leading furniture designer and manufacturer, to create seating templates and inserts that seamlessly attach to our GRC bases.

## PERMANENT FIXING AND CERTIFIED LIFTING LUGS

- Some of our seating ranges come with ferrules already embedded in the base for permanent fixing and installation on site. We are also able to embed ferrules in nominated products on request to facilitate transport, movement and permanent installation on site. Discuss your requirements with our sales team.
- We're able to insert lifting lugs into our products during manufacturing and can provide engineered certification to assist with crane lifting and placement on site. Both options are available on request, discuss your requirements with our sales team.

## FEET & CASTOR WHEEL OPTIONS FOR PLANTER BOXES

- Planter boxes come standard with 10 mm high feet, 15, 40 & 65mm high block feet options are also available on selected ranges.
- Castor wheels can be fitted to smaller planter boxes.

## BOWLS

Bring harmony into the landscape with graceful curves. Our collection of elegant planter bowls suits a variety of applications, including for use as water features. Their classic designs surpass all time and trends.

# DESIGNER BOWLS

The signature tapered forms of our Glassfibre Reinforced Concrete (GRC) Designer Bowl collection lends itself to a variety of applications and can be used as planters or incorporated into water features. Both the 1800 & 2300mm bowls can be used as integrated seat planters with the option of specifying a custom timber top.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

# ZEN BOWLS

This iconic collection encourages pause and reflection. Designed to be viewed from above, these GRC bowls have a smooth surface on the inside and a hand trowelled textured surface on the underside. They can be used as planters or water features and come with a separate circular plinth (Excluding the 1900mm bowl). There is also a spillway option available.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

# SUPER BOWLS

Our innovative collection of oversized Glassfibre Reinforced Concrete (GRC) planter bowls is an industry first and are some of the largest planters available worldwide. Their simple yet elegant curves bring balance with just a touch of theatre to large open spaces. The 4000 Super Bowl is manufactured in four segments that are bolted together on site, this allows for quarter and semi-circle configurations too, if required.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

## PLANTER BOXES

Our modular planter box collections bring balance and order to the landscape. Their understated geometric designs frame and accentuate any design theme and planting palette.

# 400, 400/600 MODULAR SERIES

Our durable Glassfibre Reinforced Concrete troughs deliver a sophisticated backdrop to any landscape. The understated modular design compliments any design theme or planting combination.

Our square and rectangular planter boxes come standard with 10 mm high strip feet cast into the base. Custom feet sizes are available should additional height or clearance be required.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

# NARROW TALL

Designed to accommodate the introduction of greenery where space is limited and where additional planting height is desired, our collection of Narrow Tall Glassfibre Reinforced Concrete (GRC) planter boxes lend a modern edge to any urban landscape.

Our square and rectangular planter boxes come standard with 10 mm high strip feet cast into the base. Custom feet sizes are available should additional height or clearance be required.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

# GEM

## FACETED GEMSTONE

This GRC collection of seats and planters was inspired by the facets of a cut gemstone. The planters are made in two parts and can be joined together in different configurations to alter the planter top profile. The seats can similarly be rotated.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

### DESIGNER: FORREST GILLHAM FOR STREET + GARDEN

Forrest is an acclaimed Industrial Designer who continues to make a big impact on the Australian built environment. His name is associated with numerous successful product designs and custom projects.

Drawing from his knowledge and experience in architectural, furniture and industrial design he channels his innate creativity to provide well-considered public space solutions, with attention to detail that showcases his appreciation and understanding of both materials and manufacturing processes.

Many of the projects that he has collaborated on have won both national and international landscape architecture awards.

# PEBBLE

## DESIGNER: SURYA GRAF FOR STREET+GARDEN

Acclaimed Australian designer Surya Graf has a background in both Architecture and Industrial Design. He believes in a clear focus and understanding of the end user's needs and behaviours within the urban environment whilst still designing with both materials and processes firmly in mind.

Maintaining a social and cultural context within the public space is a key consideration in his design approach and philosophy.

He's had the opportunity to exhibit and be published both nationally and internationally, and is the recipient of numerous design awards, including AILA's National Landscape Architecture Awards and the Good Design Awards.

This iconic GRC collection of seats successfully finds the balance between raw nature and the rounded form to add a sophisticated yet natural element to public space design and development.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

## POLISHED STONE

● Palletised for multiples only = forklift or crane required if more than one unit on order

# BOULDER

Photography by Street + Garden.

Designed by acclaimed Australian designer Surya Graf for Street+Garden this Glassfibre Reinforced Concrete (GRC) collection is inspired by the bold presence and organic shape of boulders found in the natural landscape. Its large scale and rounded edges successfully transition the intersection between the natural and built environment.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

# SEGMENT

Photography by Street + Garden.

Designed by acclaimed Australian designer Surya Graf for Street+Garden this GRC range allows you to create semi-circular or weaving seating patterns. Its minimalist and fluid design introduces curved contrast into the urban landscape. Three profiles are available to lend flexibility on the positioning and flow of the backrests.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

## MINIMALIST FLUIDITY

# FLINDERS

Named after its design inspiration and first installation — the Flinders Street Cultural Precinct redevelopment in Townsville, this GRC range will compliment any contemporary urban design project.

This collection offers an array of seating options that can be individual or linked elements. Recessed timber accents are also available for added interest and contrast.

(Note that all benches with returns are manufactured as shown, and cannot be rotated to face the opposite direction.)

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

## MODULAR BY NATURE

### DESIGNER: ALEXANDER LOTERSZTAIN

Alexander Lotersztain is an Argentinian born Australian designer and founder of the multi-disciplinary design studio Derlot. This highly awarded studio specialises in product furniture and interior design, as well as hotel concepts, branding and art direction with a long list of international clients.

His work appears in design journals around the world and can be found in the collection of Pompidou Museum in Paris. He is highly awarded in both product and interior design and in 2010 he was bestowed the inaugural Queensland Premier's Smart State Designer of the Year fellowship award.

He was named one of the 100 most influential designers worldwide in &fork by Phaidon and is among the top 25 designers to collaborate with Monocle.

Alexander is a design advisor to a number of private and government projects. He regularly presents at conferences such as TEDx and often participates on design judging panels, both in Australia and abroad. He has also appeared on Australian television, as a mentor to contestants of The Renovators.

# FLEX

These Glassfibre Reinforced Concrete (GRC) seating modules can be combined to create continuous seating that flex back and forth. Two radius options (2700 & 5800 mm) are available, and are compatible with each other to create both tighter and wider curves when installed.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

## CURVED MODULAR SEATING

# QUAD

Our GRC extra-large and free-standing Quad bench seat with integrated planter adds scale and dimension to public spaces.

Type A allows for the entire planter base to be filled with soil, allowing tree roots to extend out further. Type B has a 1.1m square, internal planter and is better suited to shrubs and lower planting combinations.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

## BOLD & ANGULAR SEATING INTEGRATION

# TWIG

Designed by acclaimed designer Alexander Lotersztain this Glassfibre Reinforced Concrete backless bench with its branch-like formation allows for the creation of meeting points in its surroundings.

It can be used as a bench or a raised connection between the landscape and its bordering hard surfaces.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

## MODULAR FLUIDITY

Twig Bench Seat  
TWIG2  
L 2370 x W 1930 x H 460 mm  
280 kg Approx Weight

# ALFRESCO

This Glassfibre Reinforced Concrete (GRC) circular seat planter easily adapts to its surrounding environment, its open base makes it easy to place around an existing column or tree, or the void can be filled with soil and plants.

It comes together in three parts, forming a cylindrical void behind the backrest. An optional internal cylinder planter is also available to contain soil and plants. To add to its versatility timber or upholstery inserts can be incorporated onto the bench seat and LED strip lighting can also be fitted to the base.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

# BONDI

This large Glassfibre Reinforced Concrete (GRC) circular seat planter introduces an instant raised planting bed with integrated seating into the urban landscape.

Bondi comes together in four sections that bolt together on site. Its open base allows for easy installation around an existing column or tree. Timber or upholstery seating inserts can also be incorporated.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

# ORBIT

This extra large Glassfibre Reinforced Concrete tree ring is made in three parts that bolt together on site.

Orbit does not have a built-in floor, which allows for easy installation around an existing column or tree.

Visit [quatrodesign.com.au](http://quatrodesign.com.au) for product specifications and drawings.

## CUSTOM DESIGN & MANUFACTURE

Public space and commercial projects often require the design and manufacture of bespoke custom planters and furniture to suit the design intent and occupancy requirements for the project.

Quatro's custom design and manufacturing experience combined with our collaborative relationship with the design industry turns any idea into a functional, yet aesthetically pleasing solution.

We have assisted the architecture, landscape architecture and interiors industry with numerous customer solutions over the years and continue to work with Australia's leading design firms to bring their vision to life.
