

# DecoUltra™ Anodised Finishes

*Durable designer finishes for creative freedom*

DECO™  
ULTRA

## **THE ULTIMATE FINISH**

Anodised aluminium has been popular in the architectural space for over a century for its metallic lustre and its ability to last in all manner of conditions. Differing from other finishing options on the market, anodising is not an applied finish – it is chemically grown on the surface of the aluminium, creating a denser, harder, more durable coating. This means anodising will not peel, blister or chip off, as it is an integral part of the metal itself.

Both an aesthetic and a protective finish, an anodised surface protects the aluminium beneath from corrosion and degradation, as well as wear and tear. Its ability to withstand moisture, salt spray, acid and graffiti means your anodised aluminium panels, extrusions and shapes will retain their attractive sheen for years to come, even in tough conditions such as coastal areas or areas with high pollution.

A truly unique finish with a wealth of benefits, anodising can enhance your next project and help you create a one-of-a-kind design that will amaze and inspire.

## THE RANGE

Choose the right finish thickness for your project requirements. Whether your building is by the coast, in the city or part of a monumental design, DecoUltra™ offers a finish for you.

### DecoUltra™ AD

A 15-micron finish ideal for residential applications and small commercial buildings.

### DecoUltra™ AD+

A 25-micron finish ideal for coastal areas and large commercial applications.

### DecoUltra™ ZD

Introducing our unique 30-micron architectural hard anodised finish. Utilising specialised Zero Degree hard anodising technology typically used on aircraft and machine parts, DecoUltra™ ZD brings a tough, super-high performance finish to the architectural space for the ultimate durability in monumental applications and extreme conditions.

Contact us to discuss custom thickness needs.

## SETTING NEW STANDARDS IN FINISH PERFORMANCE

Combining design flexibility with the ultimate durability, the DecoUltra™ range sets new standards in architectural finish performance. Utilising quality-controlled anodising technology to grow a tough finish on the aluminium itself, DecoUltra™ offers a range of stunning metallic finishes that radiate style and elegance, whilst also withstanding the toughest Australian outdoor conditions.

## LIMITLESS DESIGNS

The sky's the limit when it comes to your design. Offering six radiant colours, special effects including brushing, etching and perforation, as well as the ability to anodise a variety of shapes, DecoUltra™ can suit all applications and help you create a custom design to suit your unique project vision.

---

## SUPERIOR DURABILITY

Choose the right durability and protection to suit your project needs, with anodised surface thickness available in 15, 25 and 30 microns. Whether your project is residential, coastal, commercial or monumental, DecoUltra™ offers a finish designed to withstand your specific requirements. All DecoUltra™ finishes are designed to last, standing up to sunlight, salt spray and general wear and tear, and are graffiti resistant.

---

## EXTREMELY LOW MAINTENANCE

Refinishing will never again be an issue with DecoUltra™. This highly durable finish requires minimal maintenance and will continue to dazzle passers-by for years to come.

## MONUMENTAL PERFORMANCE

A first in the architectural world, DecoUltra's™ ZD hard anodised range offers a premium, hardwearing finish like no other. Exceeding Australian and international standard requirements for architectural anodising, DecoUltra™ ZD brings the lustrous sheen of anodising to new applications, including monumental projects and projects in areas with extreme weather conditions.

---

## QUALITY ASSURANCE

DecoUltra™ finishes are produced using quality-controlled processes, and are tested to and exceed Australian and American standards for architectural anodising.

---

## NON-COMBUSTIBLE

Anodised aluminium products are 100% non-combustible, making them safe for projects in fire-prone areas or on high-rise and commercial facades where non-combustible materials must be used.

---

## SUSTAINABLE

Made using recyclable aluminium and totally VOC-free, DecoUltra™ is the environmentally-friendly choice for your next project.

---

## AUSTRALIAN-MADE

DECO is entirely Australian owned and operated and all its DecoUltra™ finishes are manufactured in South-West Sydney, NSW, and are available Australia-wide.

### ORDER A COLOUR SWATCH

To order your free colour swatch please visit [deco.net.au](http://deco.net.au) or call 02 9603 1888.

## Custom Textures

For a unique effect, ask us about how we can brush, etch, perforate or add a custom texture to your panels for an awe-inspiring visual effect.

# A QUALITY FINISH

PROVEN DURABILITY

## Architectural Standards and Compliance

All DecoUltra™ finishes are tested to and comply with Australian Standard AS 1231:2000: Aluminium and aluminium alloys— Anodic oxidation coatings. DecoUltra™ is also tested to Qualanod, the international anodising standard, and meets the requirements of American anodising standard AAMA 611.

## Warranty Details

DecoUltra™ finishes can be warranted up to 30 years, depending on thickness, location and use. Talk to us about your warranty requirements.

## Care and Maintenance

All DecoUltra™ finishes require regular cleaning with a pH neutral cleaner to remove dirt and grime. They will never need refinishing or staining to preserve their lustre, even in harsh atmospheric conditions.

# UNLIMITED APPLICATIONS

TOTAL CREATIVE FREEDOM

Bring your architectural masterpiece to life using the versatile DecoUltra™ anodised range. DecoUltra™ finishes including AD, AD+ and ZD can be applied to a variety of flat panels and custom sheets, discs and laser-cut shapes up to 2.8m long. DecoUltra AD or AD+ can also be applied to extrusions up to 9m long. DecoUltra™ also pairs perfectly with DECO's award-winning range of aluminium architectural building products, including DecoClad®, DecoBatten™ and DecoPanel®.

## **Interior features**

Add a modern gleam to the interior of your building with anodised window frames, wall panels and more.

## **Façades**

DecoUltra™ is the ideal contemporary finish for your panels or cladding boards, adding sophistication and architectural style to the front of your residential, commercial or even monumental designs. Completely non-combustible, anodised aluminium makes a safe, compliant and beautiful option for buildings in all areas.

## **Feature walls**

Add an exciting visual element to your design with anodised battens or unusual laser-cut shapes for an eye-catching standout feature on your building.

## **Signage**

Anodised aluminium letters, numbers and shapes will create a sign that will stand out, keeping the name of your business at the forefront of people's minds, or clearly marking your address or other crucial areas of your building so they cannot be missed.

## **Soffits**

Anodised aluminium cladding can add a space age touch to your soffit linings.

## **And more**

Long-lasting and stunning to look at, DecoUltra™ anodised finishes can enhance a wide variety of applications. Talk to us about how DecoUltra™ can add a wow factor to your project.
