metric units are actual

rectified tile formats create clean lines and a framework for design. we offer a standard eased edge to be used on stair treads, base tile and other finished edge needs.

[collaborate with us](#): custom size modules up to 48" (1200mm) available to suit your specific project.

laguna

polished concrete tile

laguna polished concrete tiles are dimensionally accurate and installed with the ease of tile. simply thin-set, using a rapid-setting adhesive like mapei granirapid, over a level and cured slab.

once installed, the surface should be buffed using the htc twister cleaning system and sealed with a quality penetrating sealer such as nano 1000. pads and sealer are available from concrete collaborative. we also recommend floor finishing specialists to support your project.
