# SAS**320** ....

### Overview

A tile-only system, SAS320 has no gridwork, reducing costs and allowing for quick and simple installations. The system is suspended from edge trims or other suitable features such as lights or grilles. Intended for corridor and plasterboard surround applications, SAS320 is ideal for residential and commercial sectors with targeted acoustic demands. Tiles can be of any size to suit most building modules and trimmed for improved aesthetics across undulating walls.

SAS320 is fully compliant with Approved Document E.

#### **Module Sizes**

There are no standard tile sizes for SAS320. Tiles can be up to 3000mm in length and no less than 300mm wide. Bespoke module sizes and shapes are available on request.

#### Access

Tiles can be lifted and removed for void access. No gridwork offers clear access to services above.

#### **Finishes**

SAS320 is available in all standard SAS finishes, please refer to page 105. Bespoke finishes are available on request.

#### **Perforations**

SAS320 can be manufactured with any standard SAS perforation, and Ultramicro perforation for a brighter finish. For our full range of perforations, please refer to page 83. Bespoke perforations are also an option.

#### **Acoustic Materials**

16mm deep, 80Kg density mineral wool pad with black tissue face, foil back and sides. Other acoustic materials are available, please refer to page 20.

#### Service Integration

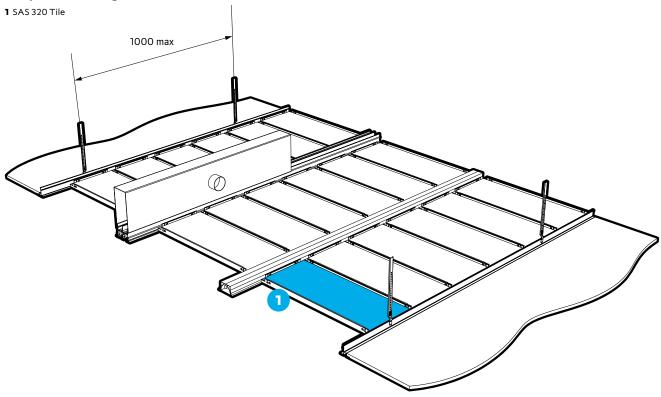

Tiles can be formed with apertures during manufacturing and post painted for integration with lights and other services.

**Please note** Loads in excess of 7Kg require independent suspension.

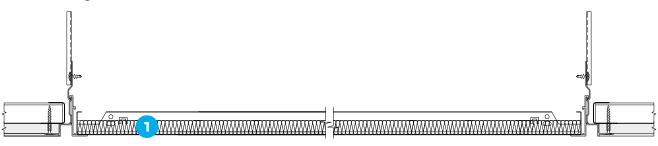

#### **Technical Support**

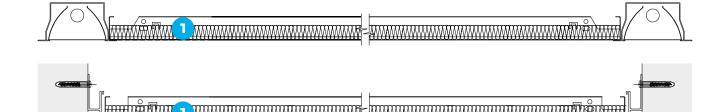

Please contact our technical team for all questions relating to access, security, bespoke features, service integration or load support.
