

G* GRASS®

VIONARO DRAWER SYSTEM

The cubist drawer system with a minimalist design combines the Dynapro slide system with a luxury look.

FUNCTION.
PERFECT FORM.
VIONARO.

G*GRASS®

When you open the innovative Vionaro drawer system you are standing in front of a movement system vision that has come to life.

Beauty, attention to detail, precision movement, and perfect industrial production – hardly any other system combines the rational and emotional aspects as harmoniously as the new GRASS drawer system. Vionaro is a combination of functional technology with a perfect form.

A statement.
For exclusive interior
design tastes.

Minimalist, luxury visual design. For all living areas.

Clear form, minimalist design and the highest quality materials – the pure elegance of Vionaro makes furniture look equally good in the kitchen, living room and bedroom.

**Created and designed in this awareness,
Vionaro is destined to be the slender design
classic of tomorrow.**

13 millimetres.
That's all perfect
design needs.

Maximum reduction means getting the maximum out of the minimum. Vionaro also sets new standards in this respect. With its slim 13-millimetre drawer sides, the cubist drawer system ensures top design of the storage space.

**When we designed Vionaro we didn't add anything –
except right angles.**

Perceptibly unique.
Brilliant surfaces
without compromise.

The sleek, absolutely seamless surfaces show that these super-slim Vionaro drawer sides consist of a single section. In the aluminium version these are made of a resilient extruded section and in the steel version of a laser-welded steel profile.

**Elegance does not mean being obtrusive,
but being remembered.**

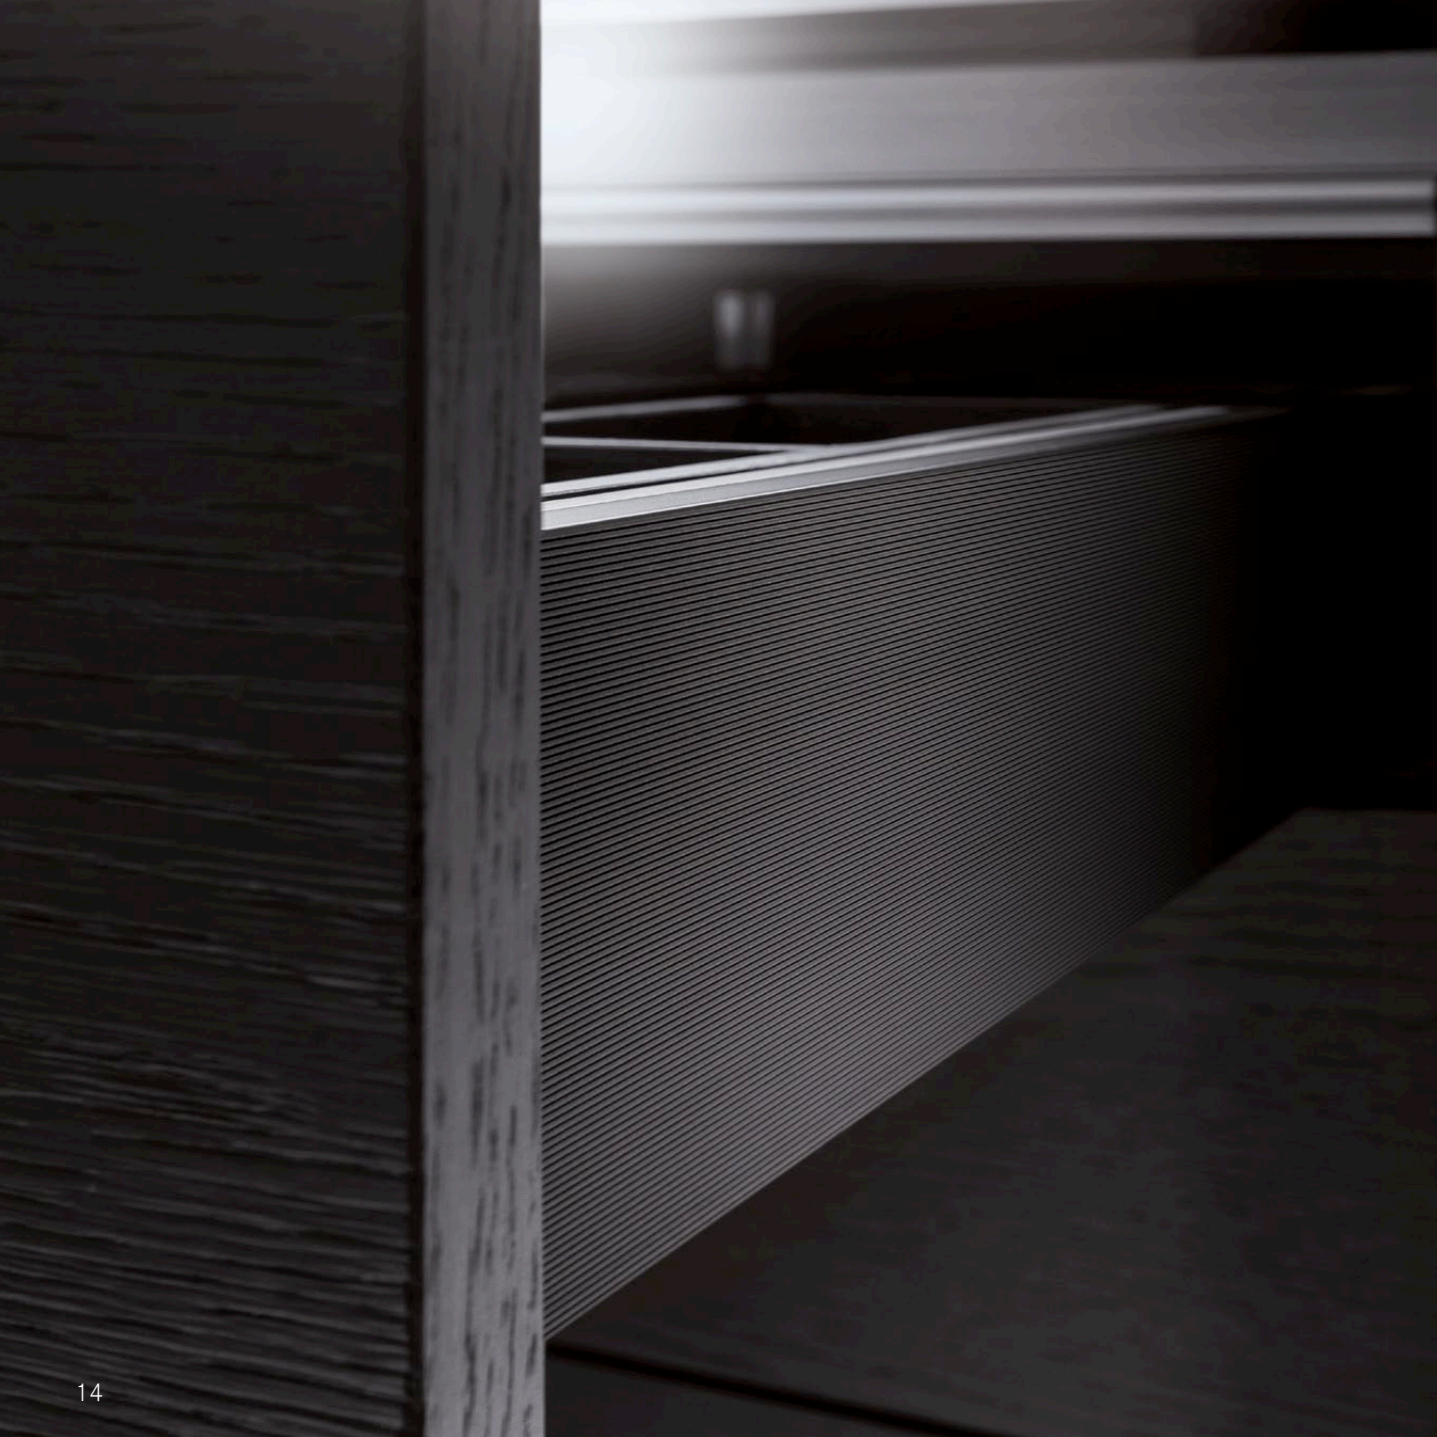

Steel in the colours snow white, silver grey, graphite and the special colour golden brown

Steel. Stylishly confident selection.

Vionaro is a direct example of the attractive lightness that can be achieved with a material such as steel.

Anyone thinking that steel is a rigid, cool material may be surprised by its power of emotional expression. The powder-coated Vionaro steel drawer side in four colours harmonises with all contemporary interior designs.

Aluminium. Impressively individual.

The slim-line Vionaro aluminium drawer sides effectively make you stand out from the crowd. Even more is possible upon request – luxury deep black aluminium, finely grooved profiles or a geometric pattern lend premium furniture its own character. Your imagination is set no bounds.

Ask us how we can make your visions become reality.

A constant reminder.
Make sure your customers
don't forget your brand.

Your logo can be discreetly but noticeably integrated into the stylish Vionaro drawer side design.

You have the choice between durable and non-wearing laser branding and a branding clip. This can be simply attached as a slim-line plastic clip in three colours.

High and higher.
Highest possible fronts for
an elegant front appearance.

The architecture of modern furniture appeals with its expansive surfaces and simplicity of form. Vionaro provides maximum stability for such items of furniture characterised by visual effect and design. No limits are therefore set for extending fronts over the entire height of the furniture.

This is how Vionaro ensures individual design freedom.

The ideal supplement.
As compelling on
the inside as it is on
the outside.

Minimalism and understated elegance are the trends of our times. Vionaro continues the external elegance of pot drawer fronts through to the inside. Inset drawers are beautifully rounded off with the colour-coordinated front panel profile made of aluminium.

**Vionaro is a source of inspiration
for living trends.**

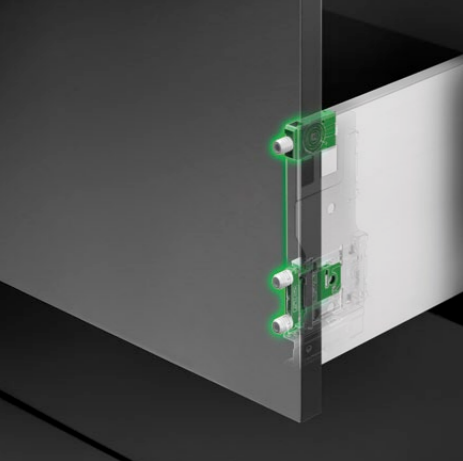

Storage space organisation.
Good design is not restrictive
but creates space.

With its perfect 90° angle and the absolutely straight insides, Vionaro features space for the individual dividing systems of many premium manufacturers.

**This permits a wide range of options
and creates a customised effect.**

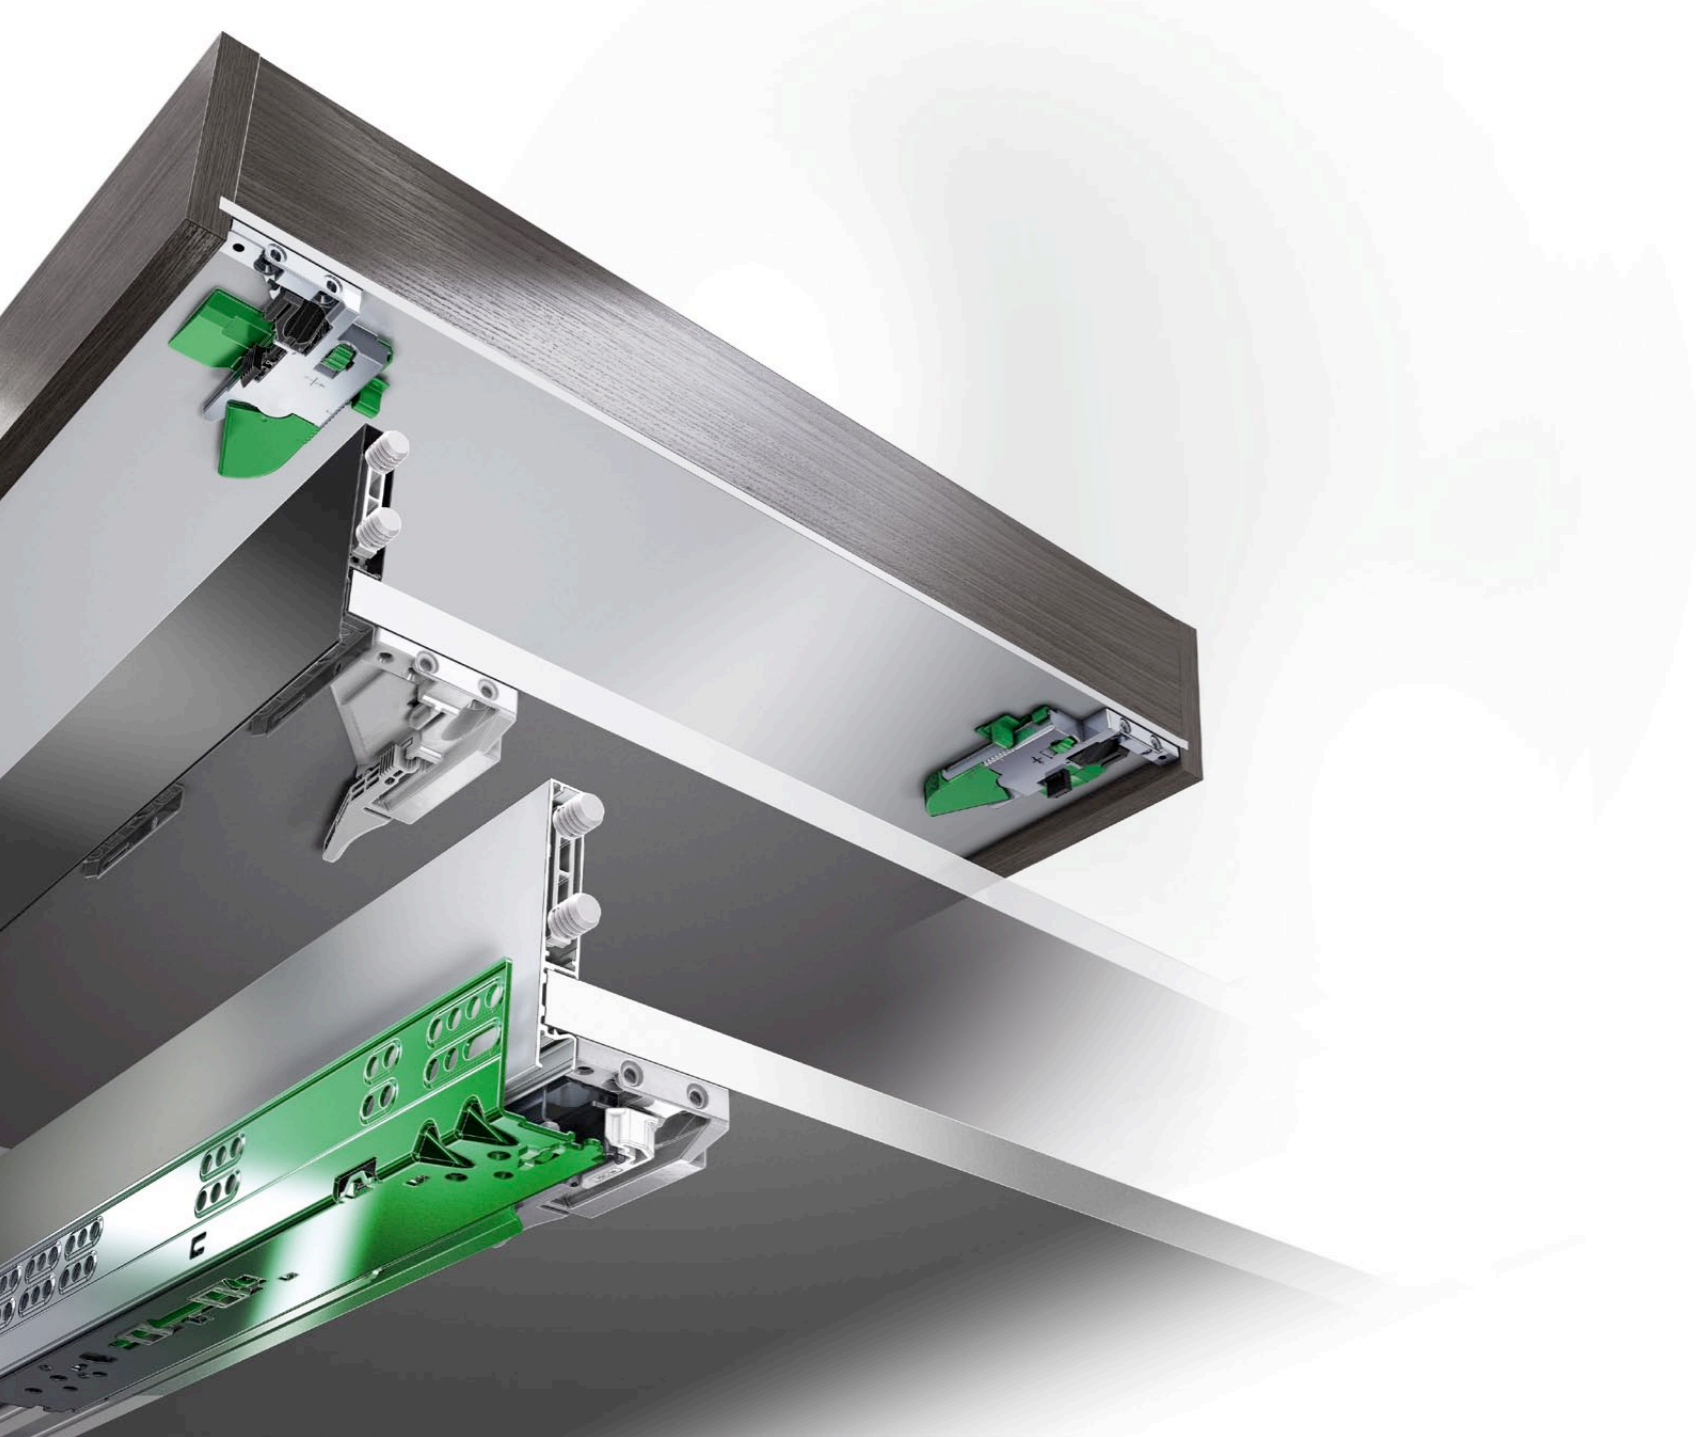

VIONARO DRAWER SYSTEM

Cleverly designed down to the last detail.
For optimum processing convenience.

Our passion for first-class workmanship is evidenced in the detail. The drawer sides can be easily connected to the bottom panel with the unique patented GRASS knock-in spike technology – without the need for additional milled grooves. The rear panels can be quickly and simply fitted with the rear panel connection integrated into the drawer side. The easy-to-use 3D adjustment feature inside the drawer side as well as the optional depth adjustment ensures an optimum front alignment.

Discover the many special Vionaro advantages.

Cleverly attached.
Vionaro features
the best of Dynapro.

The new design system has everything that Dynapro has: High load capacity. Excellent running characteristics. Synchronised movement.

Vionaro makes use of all the qualities of the track-proven concealed slide previously only used for wooden drawers. As a result we have succeeded in turning Dynapro into a modular system solution. When combined with Vionaro, the synchronised concealed slide system with its high load capacities of 40 and 70 kg becomes an ideal drawer system for modern living environments.

GRASS comfort systems. Maximum operating comfort when opening and closing.

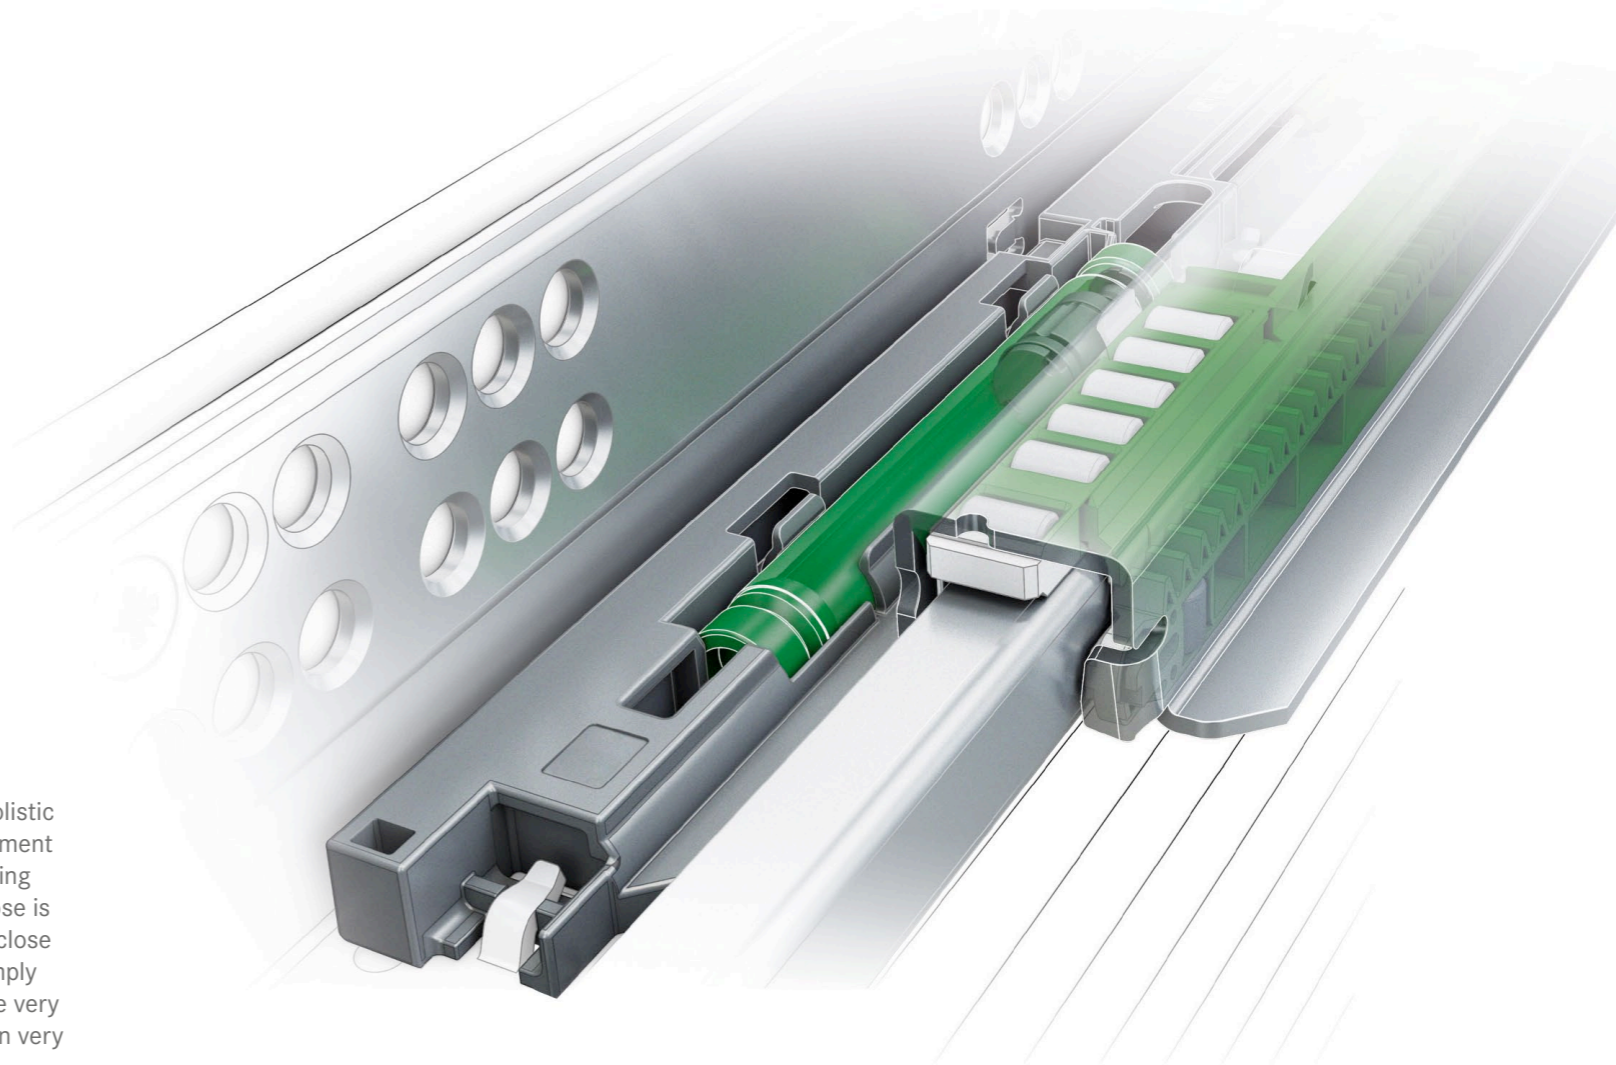

Movement comfort of the very highest level: GRASS opening systems for handle-free furniture.

Large, handle-free fronts can be opened by tapping gently when they are fitted with **Tipmatic**, the mechanical opening system.

Sensomatic, the electromechanical opening system, combines all the advantages of handle-free opening with the elegance of damped closing.

Soft-close – the integrated damping system sets new standards.

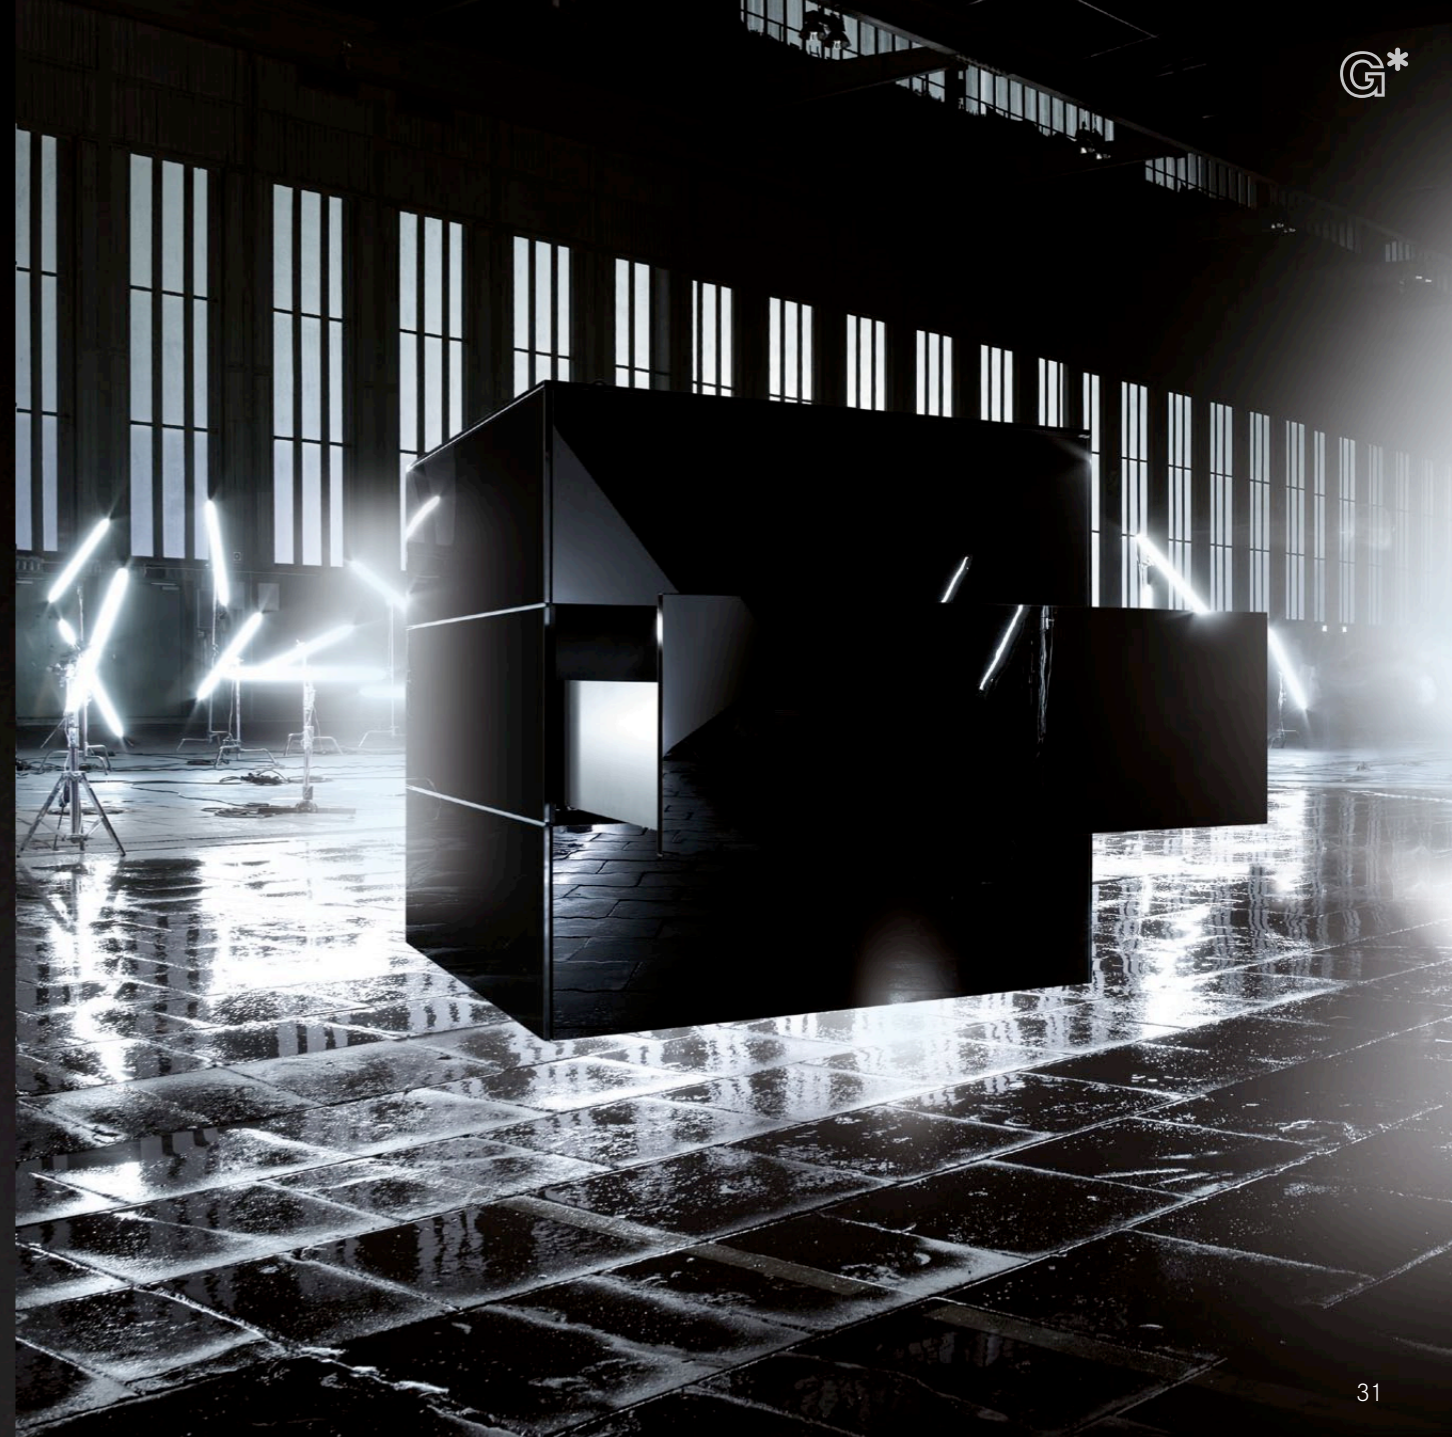

With the GRASS Soft-close holistic damping concept, each movement becomes an experience. Closing Vionaro drawers with Soft-close is something very special. Soft-close gently slows the front and simply pulls it softly closed. With the very low extension resistance, even very slim-line handles are possible.

Perfection. Clever design movement.

The outstanding properties of the Vionaro drawer system at a glance:

- **Minimalist design:** 13 mm slim-line drawer sides, 90° inside surfaces and homogeneous outside surfaces.
- **Varied selection options:** Anodised aluminium drawer sides or steel drawer sides in the colours snow white, silver grey, graphite and the special colour golden brown in the heights 63 mm, 89 mm, 121 mm, 185 mm and 249 mm.
- **Systematic stability:** Torsion-free drawer sides and an integrated front stabiliser for the 185 mm drawer height ensure perfect firm attachment.
- **Adjustment comfort:** Stepless side, height and angle adjustment integrated into the drawer side.
- **Perfect movement:** With Dynapro, the track-proven concealed slide, Vionaro uses the same basis as previously used for wooden drawers with bearing capacities of up to 70 kg.
- **Simple processing:** The cleverly designed fine details make assembly as easy as possible and save valuable time.

VIONARO

With Vionaro a superlative movement system takes the stage in living rooms, bathrooms and kitchens.
